

FCCLA Planning Process Summary Page Template

IDENTIFY CONCERNS

Our top concern is that parents, students, and the community do not have a way to see what events our local FCCLA chapter is planning or hosting. Our other concern is that there is no way to provide information that the students and parents need to know about our chapter and of FCCLA as a whole instead of posting the aftermath of our events on tik tok and other social media sites.

SET A GOAL

Our first goal is to provide future information to parents, students, and also the community using our new chapter website. Our second goal is to keep the website updated with information relating to FCCLA as our state organization and national organization. We want the website to be all encompassing with easily accessible links to not only our local events but state and national ones as well.

FORM A PLAN (WHO, WHAT, WHEN, WHERE, HOW, COST, RESOURCES, AND EVALUATION)

Who: Ashlyn Oyler and Leah Crowder

What: Creating a website about our Osceola JH FCCLA Chapter.

When: September 2023

Where: Osceola High School FCS room

How: We will start building our FCCLA Chapter website on <https://www.wix.com/>. We will first start by creating the format for the website, our format based off of the FCCLA Branding guide that was provided.

After the website format is completed we will add the information and components required.

Cost: \$0.00.

Resources: <https://fclclainc.org/> <https://missourifccla.org/> <https://www.leadfcsed.org/national-standards.html>
<https://www.tiktok.com/@osceolafccla> <https://m.facebook.com/people/Osceola-FCCLA/100075976068763/>

<https://docs.google.com/> <https://www.canva.com/> FCCLA Advisor Mrs.Straw

Evaluation: We think this plan will be successful based on our prior research and all of our resources we have collected.

ACT

The first step we took was by finding a program we could build a site on from scratch that was free or low in cost. We chose to use Wix Website builder. Using the Wix program we were able to customize our themes and ideas to help us find designs for our website. We started by making the base for our website, we made different pages with the theme we wanted our website to have. After the base was done, we began by adding the required components, as well as all other items. We made sure the site was user friendly.

FOLLOW UP

We learned that creating a website is difficult. Even Though the Wix site is and stated that it is user friendly as well as free, we really had no idea what we were getting into. We are so glad we chose this project as it helped us to gain STEM skills we might not have the opportunity to learn about. We also learned that creating this with a partner is difficult as well. We had to learn how to create a website but it would have been much easier if one of us had more STEM skills to make this project go over smoother. What we liked about this project is that we were able to have our own creative input into the website. This project also taught us the importance of teamwork and understanding when working with a partner that is also involved in other activities. Overall we think this project was successful and look forward to keeping this site up and going not only for our STAR event but for our chapter, club, and community.
